

Board of Directors Health & Human Development

Candidate Name: Monique Francisco

Major: Human Services

Bio: My name is Monique Francisco, and I am a first-generation college student in College of Health and Human Development. I graduated from Cosumnes River College in Sacramento with highest honors and earned my Associate Degree in Biology: Pre-Nursing. I decided to transfer to Cal State Fullerton to pursue a Bachelor's Degree in Human Services.

As a Human Services major, I love being able to support and encourage others to reach their true potential. Through my previous and current experiences in my classes, internship sites, and activities with both on and off-campus organizations, I have been able to learn to apply various helping skills which have prepared me to become an effective and empowering advocate for others.

Even though I have only been at CSUF for a semester, I have had the opportunity to meet and make connections with so many amazing students, faculty, and staff. I was and still am astounded at how amazing the people are on our campus. Because of their support, I have always felt welcome. CSUF has come to feel like my second home, and because of that, I want to become more deeply involved in the continued success of our Titan Family.

Platform: It is my strong belief that every student has the right to attain a quality education at an institution that works as hard as they do to see to it that they thrive and succeed in their college careers. As the ASI Representative for the College of Health and Human Development, I aim to serve our students to the best of my ability. I want to support and empower each of our students to achieve success in all of their academic endeavors.

Through listening attentively to your concerns and gaining a better understanding of the issues, I will be able to become an effective advocate on your behalf, and together, we can create positive changes that will not only benefit our current students, but will also benefit students in the future.

I love and appreciate that our campus is comprised of individuals from all different walks of

Board of Directors Health & Human Development

life with various needs and concerns which is why I aim to understand each of our students from a place of cultural awareness and competence. I believe that our diversity as a campus makes us stronger and that each student has something of value to bring to the table.

I hope to encourage and empower students to take an active role as a citizen of the College of Health and Human Development to meet with me and let me know their concerns so that we can effectively address them and improve the quality of life for all our students on the CSUF campus.
