

ASI Student Involvement Outcomes

Report 2008-2009

Background/Overview

In 2006, the ASI initiated a student learning outcome assessment program based upon work done by the University of Minnesota-Twin Cities which outlined seven outcomes of a student's engagement in the programs and services of the student affairs division. The ASI has adopted these seven outcomes as Student Involvement Outcomes (SIO), stating that students involved in the programs and services of the ASI develop and demonstrate achievement in: responsibility and accountability, independence and interdependence, goal orientation, self-confidence/humility, resilience, appreciation of differences and tolerance of ambiguity. The target for the SIO program is both student employees and student leaders.

Data Collection Methods:

ASI Student Employees

- Throughout the year, all departments within the ASI participated in measuring student learning outcomes for student employees within their specific areas, as part of an organization wide effort. The methodology used included start-of-position assessments (both self-assessments and assessments performed by the student employee’s supervisor) in seven outcome categories. These categories covered specific skill sets, such as: responsibility & accountability; independence & interdependence; resilience; goal orientation; self-confidence and humility; tolerance of ambiguity; and appreciation of differences. These specific assessment skill sets were incorporated into student employee position descriptions and performance evaluation tools, in an effort to reinforce the desired learning objectives.

ASI Student Leaders

- Student leaders are introduced to the ASI Student Involvement Outcomes during the orientation to their new positions and during their training retreats. At the start of each month, they focus a portion of their council, board or program meeting on that month’s ASI Student Involvement Outcome of the Month. The student leaders are assessed (360 Degrees: student, peers, advisors) in their development of the seven ASI Student Involvement Outcomes. The methodology used to evaluate the student leaders includes a pre-assessment, pre-assessment, end-of-semester assessment, and end-of-year assessment.

Camp Titan

- Camp Titan engages student volunteers as camp counselors and program staff for a one-week residential camp program. These volunteers participate in approximately 28 hours of training over the course of the spring semester. After the camp week in June, a survey is sent out to each

of the volunteers asking them to self evaluate on each of the seven ASI Student Involvement Outcomes.

ASI Student Leaders

This year this program was conducted with the ASI Productions, Association for Inter-Cultural Awareness, and Titan Tusk Force team assessing the student leaders vis-à-vis the ASI Student Involvement Outcomes. This modified 360 degree review compares the student leader's self evaluation with peer evaluation, the student director of the program, and the advisor. The following is preliminary interpretation of raw data which represents mean score on a 5 point scale with 1= never and 5=always and n=21.
