UNFINISHED BUSINESS

a. Proposal to add the F45 Training Program to the SRC

Hill requested a motion to bring the proposal to add the F45 Circuit Training Program from the table. (La-m/Mendes-s) No objections.

Hill reminded the Board that the previous discussion regarding the F45 CTP was referred back to the Programs and Services Committee to review the fee structure and to amend the proposal as applicable.

BOT 011 17/18 (Programs & Services) A motion was brought to the Board by the Programs and Services Committee to approve the amended proposal to add the F45 Training Program to the SRC with an additional instructional course fee not to exceed $20.00 per semester or $40.00 per year for CSUF students.

Hill yielded to Hesgard. Hesgard shared the committee discussion for the F45 proposal and the costs associated with the program. Tapper was asked to bring financial impact data and how a fee structure would work and what the impact to budget would be. Hesgard yielded to Tapper to review the proposal.
Tapper reviewed the fee structure of the SRC programs and potential fee structure for the F45 program.

Hill opened the floor to questions.

Scialdone asked for clarification on the amount of the example set for costs. Allen asked if program is optional for students. Tapper clarified the program is optional for members, sign-up basis.

Hill shared that some of the discussion at the committee is payment options. Reviewed other prices being charged for other services. Clarified the cost subsidization for funds that would not be covered by fees.

Gwaltney asked, what cost would be at another studio. Tapper responded approx. $150 per month. Hill provided the overview of cost breakdown.

Mendes thanked Tapper for information to help in making decision. Hill opened the floor to discussion.

Jakel made an amendment #2 to motion BOT 011 17/18 to amend the proposal to remove the 20/40 cap to increase the potential for the program to be fully funded and to allow management of the Titan Rec to have authority to set the pricing. Wong seconded the amendment. Scialdone asked if there was a cap on the amount of space available for the program. Tapper confirmed that there are caps in the amount of participants per class and the number of classes that can be offered at one time. Jakel spoke to the first, indicating that the proposed pricing falls in line with other low cost classes in the SRC. The proposed rates are very affordable, based on all other services offered at the SRC.

Hesgard, important to have cap to keep fees as low as possible for students. She stated she would rather have the SRC come to the Board in the future to request an adjustment. Mendes agreed with Hesgard to keep the cap. Jakel shared that considering alternatives is a good part of the political and governance process to discuss how we oversee areas that we are responsible for. There was no further discussion. Hill asked if there was any objection to moving to a roll call vote on the amendment. Amendment #2 to motion BOT 011 17/18 failed with a 3-8-1 roll call vote.

Hill opened the floor to discussion. Ayala made an amendment #3 to motion BOT 011 17/18 to amend the proposal to read “Request to offer the F45 circuit training program in the Student Recreation Center with an additional instructional course fee not to exceed $20 per semester or $40 per year for CSUF students, and other SRC member pricing will be at management's discretion.” La seconded the amendment. Jakel asked if the $20/$40 was for students only. Hill confirmed. Mendes asked if the non-student pricing would give the SRC an opportunity to make up the deficit. Hill confirmed. Mendes shared that he felt that the amendment was a good idea. Hust shared that she agrees, this seems to be a win/win, to keep student fees low and allow for adjustment through other fees. Hill commented that the rates presented still seem to be great for users. There was no further discussion. Gwaltney shared that she was excited that this might open the SRC to power workout users on campus. Hill asked if there were any objections to moving to a roll call vote on amendment #3. There were no objections. Amendment #3 to motion BOT 011 17/18 passed with a 12-0-0 roll call vote.

BOT 011 17/18 (Programs & Services) MSC: 12-0-0 The motion passed.

Request to add F45, a circuit training workout class, to the Student Recreation Center.

PRESENTED TO: Titan Student Centers Board of Trustees

MEETING DATE: September 13, 2017

PRESENTED BY: Rebecca Hesgard
Aaron Tapper

BACKGROUND
Titan Recreation is always looking into the current fitness trends to make sure we are staying current with the programs we offer. Recently, we have installed a QueenX Precor functional training rack and feel the F45 program will help continue to keep Titan Recreation current with the fitness trends.

PROPOSAL
Request to offer the F45 circuit training program in the Student Recreation Center with an additional instructional course fee not to exceed $20 per semester or $40 per year for CSUF students.

RATIONALE
F45 is a newer developed program that offers High Intensity, Circuit Training work-outs that will be extremely beneficial to CSUF students and members. The work outs are offered in class settings that will be offered 5 times per day, each day of the week.

IMPACT
There won’t be much of an impact on students or members as we have already transformed some of the room to accommodate the QueenX training rack. We would need to relocate some of the machines from the room onto the cardio floor.

BUDGET IMPACT
All of the equipment and programming is free for the first 12 months. After 12 months, there is a $2,000 per month fee to continue offering the programs. The additional cost will be the hiring of class instructors who will teach each class which will be about $17,000 per year. In this current budget, we can afford to pay for the instructors to teach the classes but would look at an increase in next fiscal year’s budget.

IMPLEMENTATION TIMELINE
Plan would be for installation of equipment in December 2017 and using the intersession break to train the class instructors and have the program fully available for the spring 2018 semester.
