## Ball Painting

Try using a wiffle ball, pinecones or other textured balls and other textured materials found in nature!

① Put paint in the cup and drop the ball in. Put enough paint to coat the ball.

② Add paper to the tray and allow your child scoop and plop the ball onto the paper.

③ Have your child hold each end of the box and to move the object around.

Try this activity with multiple colors! Allow your child to be as much of the process as possible. They can squirt the paint and add the spoons!
