Shape Puzzle Matching

This is an easy activity to put together.

You'll need: Paper, marker, & scissors!

- Draw some different shapes on a piece of paper
- Cut out the same shapes you drew from the other pieces of paper.
- Your child can then match the cut out shapes to the shapes they have drawn on their paper.
- You can have your child count the sides of each shape, and talk about the differences of the shapes as well.
