

Activity Share: Skittles Rainbow Experiment

To Make a Skittles Rainbow you will need:

- Warm Water, Plate, and Skittles!
1. Line the skittles on the plate
 2. Add warm water to the middle of the plate filling it so most of the skittle is covered in water.
 3. Watch the Rainbow appear before your eyes!

*Try to have a plate with a little slope inward, so the water will run down into the middle of the plate.

Age group: Toddler & Preschool

Simple Skittles Science Experiment
