Homemade Binoculars

Have you ever wondered what to do with your leftover toilet paper rolls or paper towel tubes? Well here's an idea, make a pair of homemade binoculars. All you need is two rolls, which can be fastened with a stapler or tape. Children love to play I-SPY. Use this tool as a prop for the game. Give your child clues to something in the environment, they can use their binoculars to find the item! You can even take them on a nature walk. Enjoy!
