DRDP Measure: COG 2: Classification
Age Group: Toddler

Sorting Toys by Color!

Here's what you'll need:

Random toys: different colors

Colored baskets or pieces of paper

- Lay out your baskets/paper on the floor and scatter the toys you have gathered in front of them.
- Encourage your child to be a “helper” and help pick up the toys.
- Encourage your child to put the toys away in the correct color bin. This is an opportunity to identify the color and then ask your child to put it in the corresponding basket. “That is a *yellow* car! Which basket do you think that yellow car should go in?”
- Have Fun!!
