Sink or Float: Activity: For this activity you will need: bowl or container to put water in, a few different objects, predictions recording sheet (optional).

1. Fill the bowl or container about half way with water
2. Have your child choose an object, the crayon for example - make a prediction on if it will sink or float.
3. Have your child place the object into the water and see what happens.
4. Repeat steps 2 and 3 until you have tried all the objects!
5. Have fun!!
