

Child Group Time Recorded Session

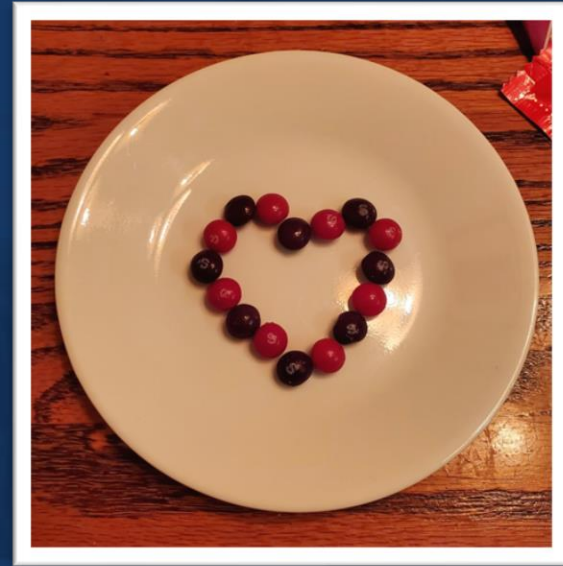

Science Activity: "Sweet-Heart Experiment"

Materials Needed:

- At least two different colors of coated candy (like M&M's or Skittles)
- White plate
- Warm water

Directions:

- Place the candies in a heart shape on a white plate.
- Have your child predict what will happen when the warm water is added.
- Slowly pour the warm water down the side of the dish to prevent the candies from moving when the water is added
- Observe the colorful reaction!
