**Texture Board**

Use items such as sandpaper, felt, different textures of fabric, bubble wrap, and anything else that would be interesting to feel and explore, on to a large piece of cardboard.

You can modify this activity by making a matching game! To do this, use smaller separate pieces of cardboard and add the desired texture. Make two of each type (2 felt, 2 bubble wrap, etc) for your child to match.

Use words to describe the textures (rough, soft, fuzzy, bumpy), or ask your child to describe what they feel!

Many items can be found around your house. Here are some ideas:

- Aluminum foil
- Bubble wrap
- Felt and other fabric textures
- Feathers
- Sponge
- Sandpaper

Use the same material to make a texture matching game!
