

## Activity Share: **Ice Sensory Bin**

Age group: **Toddlers-Preschoolers**

At school, we enjoy freezing materials (sea creatures, dinosaurs, water beads, gems, Arctic animals, etc.) in containers to add to our water table!

*Try this activity at home!*

Add any materials to plastic containers (metal bowls also work well) then, add water. Freeze overnight. Add to a bin of water, or if outdoors, you can put it directly on the ground/grass! Add additional water toys such as cups, spoons, tongs, eye droppers, toy hammers, (children enjoy trying to break the ice!).  
Optional, if using a water bin you can add liquid water to color the water.
