

## Activity Share: **Building with Recycled Materials!!**

Age group: Toddler (But actually any age could enjoy this!!)

- This is a great activity using some recycled materials that you may have around the house.
- Children will use engineering and problem solving skills to make their buildings. These non-standard, recycled materials let children use their own creativity and thought while building structures!
- You can use any materials you have around the house: Toilet paper rolls, Paper towel rolls, Milk cartons, cereal boxes, tissue boxes, egg cartons, etc.
- ❖ After you're done building you can have your child paint the materials, for an art project!

Recycled Building STEM Activity

**RECYCLED BUILDING**
