DRDP Measure: PD-HLTH 3: Gross Motor Manipulative Skills - Age Group: Toddler

### Can you hit the Balloon?

*\*Side note: you can use a paper towel roll to hit the balloon or even just your hand! Count how many times you can hit it!*

Skills Developed	Targeted Senses
Hand eye coordination, motor planning & visual skills	Visual sense

#### How to Play

A great activity to develop your toddler's hand eye coordination skills. Simply tie a balloon to a long string and attach it to the ceiling. I used a removable wall hook but you can also use masking tape.

Then give your toddler a bat and let them swing away. I used a small piece of a pool noodle as a bat.
