DRDP Measure: Inquiry Through Observation and Investigation & Knowledge of the Natural World

Age Group: Toddlers-Preschoolers

Insect Observation

May is a great time to explore nature!

- Go on an insect observation hunt around your neighborhood or park.
- Have your child dictate what insects or bugs they find and other observations about their insect/bug. When they are finished dictating to you their observations, have them draw a picture.
- See how many you can find!

My Insect Observation

What insect did you find?

Draw a picture of it or place a photo here:

Does it have wings?

Does it have antennae?

Does it have a hard body?

Where did you find it?

What else do you notice?
