DRDP Measure: Cause and Effect
Age Group: Preschool age

Melting Ice

Materials needed:

- Ice cubes any size
- Small containers

Directions:

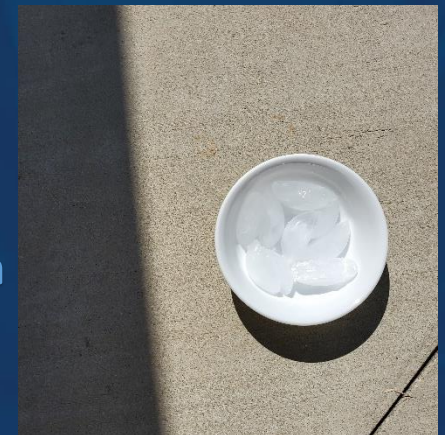

- put a couple ice cubes in each container.
- ask your child to place the containers around the home and observe which ice melts first.

Which ice cubes melted faster?

*Test this experiment outside too!
Placing a container in direct sun
and another in the shade.*

In the shade

In the sun
