DRDP Measure: Curiosity & Initiative in Learning

Age Group: Preschoolers

Oviparous Animals Activity

Use plastic eggs and place small oviparous toy animals inside (small animal erasers work well too). Your child will enjoy opening the egg to see what animal they will find as well as learn about animals that hatch from eggs vs. those that do not. Some ideas are: *dinosaurs, birds, frogs, snakes, fish, spiders, turtles, etc.*

Take it further, and write down vocabulary such as: *oviparous, shell, eggs, hatch, etc.*

Click here → [Oviparous Animals](#) to color and create your own book!
