Simple ways to boost baby's brain development

Talk!

Don't worry about what to say, or whether your baby understands. The sound of your voice matters most!

Read!

Whether it's the newspaper, an email, or a page from your favorite novel, every word you read benefits your child's development!

Sing!

Can't hold a tune? Your baby doesn't mind! Sing your old favorites or learn a new melody - either one could become your baby's special lullaby!
