IRA Funding/Deliberation Process

2022-23 Academic Year

The Committee will evaluate all completed IRA proposals received by the announced application deadline. The Committee will review and approve the application rubric and the deliberation/funding process in the fall semester of each academic year and propose any changes to the University President, if necessary. The approved deliberation/funding process and the approved rubric scores will be utilized in the spring semester to determine which programs will be recommended to receive IRA funding. The rubric may be edited by a majority approval of the IRA Committee to include campus priorities, while providing ongoing support for quality programs “that aid and supplement the foundational educational mission of the institution.”

Post-application Process

After receipt of applications for IRA funding, ASI will conduct an administrative review and prepare the applications for consideration by the Committee. This process will typically occur over the winter break and prior to the beginning of the Committee’s deliberation in the spring semester. This administrative review will confirm:

- Mandatory funding orientation was completed (confirmation signature on application)
- Mandatory Conflict of Interest (COI) training completed and attestation of COI provided.
- IRA Final Report for the previous year was submitted, if the program received an award in the prior year. The report summarizes the program’s learning outcomes and financial performance in the prior year.
- Syllabus for the course listed in the application was submitted
- Courses listed in the application have final University approval by verifying the department Chair’s and Dean’s signature
- Start/end dates of the program match the semesters the course is taught and are within the upcoming fiscal year (July 1 through June 30 of the next year)
- Expenditures listed in the application are eligible for IRA funding. Ineligible items are removed from the proposal and a modified proposal is submitted to the Committee for consideration and noted with the Committee.
- Detailed travel costs are documented on the appropriate form for each trip and verification that travel calculations are correct, including not exceeding the maximum amounts allowed per student per trip ($500, $750, $1500). Additionally, travel dates are confirmed to ensure travel occurs during the fiscal year.
- Travel is required for course credit by verifying with the syllabus.
- Proposals for new programs meet the general criteria from the IRA Governance Document
- The amount of the request is between $2,000 (minimum award) and $120,000 (maximum award).

1 http://www.fullerton.edu/data/assessment/assessment_at_csuf/missionstrategicplan.php
Programs that fail to submit their final report from the prior year as required will only be considered for funding after consideration of all programs that submitted a complete application, if funds are available.

Committee Role

Using the approved rubric, all proposals will be rated by a minimum of three Committee members, with no Committee member rating proposals from their own college. The IRA Committee Chair will assign the proposals, with assistance from ASI, to each voting committee member for evaluation. Each committee member will receive the following:

- Current year application
- Prior year final report, if applicable
- Any modifications made to the application by ASI

Committee members will conduct their evaluation and electronically submit their rubric ratings to ASI for calculation by the published evaluation deadline. The ASI Financial Service Office will be tasked with calculation of the overall rubric score per rater based upon the weighted rubric category scores.

Deliberation Considerations

To outline a fair process to allocate IRA funds, the following deliberation process is provided. The purpose of the deliberation process is to determine how to fund as many programs as possible. Factors to consider include how existing programs have used funds in prior years, how to provide “stable an adequate” funding, and how to encourage new and innovative programs. Because returning programs have additional information (prior year ratings, prior funding levels, prior expenditure levels, etc.) there are additional factors considered. See Governance Document section III-B for more guidance on balancing funding priorities. The Committee should keep in mind the purpose of the IRA funds to balance the needs of returning and new programs.

Prior to the first deliberation meeting of the spring semester and with approval of the IRA Committee Chair, ASI will submit to the Committee an overall summary of the applications including the following:

- Rubric score averages, including standard deviation
- College Dean ratings
- Requested funding amount
- Revised funding amount
- Prior year funding award and rating, if applicable
- Number of years the program has consecutively received IRA funds

Proposals will be listed in rank order by overall average score (along with standard deviation for each average score). In the case of a tie in committee rankings, the Dean ratings will be considered. Allocations will be determined utilizing all available information, including the weighting rubric averages, Dean’s ratings, prior year final report, etc., as factors contributing to the final funding recommendation. Programs will be rated by the Dean based on the merit of the
program according to the college mission on a scale of 1 to 3 similar to the rubric. (3 - excellent, 2 - good, and 1 - poor)

The Committee should review any program that has a high standard deviation or a change (higher or lower) from one quartile to another from the previous year’s rankings prior to making a funding decision to determine if the current ranking is appropriate. If necessary, an additional rater will be utilized and included in the average rating score.

It is important to realize that there typically are limited and often insufficient IRA funds to fully award to all programs. The Committee’s purpose is to apply a critical analysis, remain focused on the intent of the IRA program, and make difficult decisions regarding which programs to fund.

The IRA Committee will, following Robert’s Rules of Order, utilize a speakers’ list during deliberation and debate to ensure that every voice is heard. Speakers will be called upon in order and individuals will be asked to allow others to speak first before joining the discussion for a second time. Because of IRA’s student-engagement focus, student committee members are encouraged to actively participate in the deliberation discussion.

Funding Process

Funding will be provided based on a correlation to the program’s rubric ranking as outlined below:

Step 1
The budget shall be presented to the Committee as soon as it is available. Available funds for the upcoming year’s awards are based on the estimated fee income plus one-third of the surplus funds from the prior year.

Step 2
ASI will conduct a review and analysis of all applications to ensure compliance with all regulations, policies, requirements, and application criteria. Applications that meet the requirements will be prepared for submission to the IRA Committee. To address the importance of balancing funding for existing and new programs, while establishing limits for both, the following application limits exist for existing and new applicants:

Existing: Existing programs may request a maximum increase of 10% above the previous (last closed fiscal) year’s actual expenditures or an average of the prior three year’s actual expenses, whichever is greater. The Committee may award a higher increase, based on justification for the higher increase included in the proposal and with consideration of the Deans ratings, the program report from the prior year, etc. Existing programs that did not receive an award in one of the last three years will be funded based on their most recent year’s actual expenditures. Existing programs that did not receive an award in any of the last three years will be funded in the same manner as a new program.
New: New programs may request funding based on the needs of their initial program proposal, but will be subject to all guidelines for existing programs in subsequent years.

**Programs receiving a rating/score below 2.0 in the fourth quartile shall be reviewed to determine if funding should be awarded.**

**Step 3**

All proposals will be rated by 3 committee members and the proposals will be ordered by average rubric scores, highest to lowest, and divided into quartiles.

If the total dollar amount of all requests is less than the total available funds, all programs will be funded at the calculated award amounts.

If the total of all requests is greater than the total available funds, decreases in awards will be made in the following order, to create an “adjusted award amount” and the process will be completed when the adjusted award amount is smaller than the total available funds.

**Step 4**

When requests exceed available funds, all programs in the bottom quartile will not be funded unless the following conditions are met.

**Step 5**

A. If there are insufficient funds…
   - Graduated cuts across all quartiles will be processed until the award amount matches the total available funds amount (i.e., all programs receive a 2% cut. If the requests still exceed available funds, all programs will receive a 4% cut, then 6%, etc.)

B. If there are funds remaining…
   - Any additional remaining funds shall be allocated as follows:
     - 50% of remaining funds distributed equally to the first quartile (not to exceed the requested amount).
     - 30% of remaining funds distributed equally to the second quartile (not to exceed the requested amount).
     - 10% of remaining funds distributed equally to the third quartile (not to exceed the requested amount).
     - 10% of remaining funds at the discretion of the Committee may be allocated to the fourth quartile based on the merit of the program (not to exceed the requested amount).

C. The remaining funds will be returned to reserves.

**Step 6**

The minimum award is $2,000 and the maximum award is $120,000. Requests that fall below the minimum will receive no award and requests that fall above the maximum will be adjusted to $120,000.
Step 7
IRA staff will submit the spreadsheet of all programs based on the calculations above to the IRA Committee for consideration. The IRA Committee will begin deliberation, including a thorough review of the rubric ratings, quartile placement, and proposed funding allocations. The IRA Committee may then discuss and consider adjustments to the proposed funding based upon additional information that includes the Dean ratings, prior year rankings (if any), and prior year final report(s).

Step 8
When the process is complete, a review of the entire list will be done to make any final adjustments to funding levels.

The IRA Committee may grant more or less funding than requested based on the funding criteria described above. In all instances, rubric rating averages, Dean’s ratings, prior year final reports, etc. should inform funding decisions, but should not serve as a substitute for overall committee judgment.

Final Recommendation of Funding
A majority vote by the IRA Committee is required to recommend each program’s funding levels to the University President. Throughout deliberation, while there may be votes on modifications to funding levels for individual proposals, a final vote must be conducted, with a majority approval of the overall recommended IRA funding/budget.

Appeal
If programs wish to appeal based on a technical or procedural error, they must do so within five business days. Appeals will be heard at the next regularly scheduled IRA Committee meeting. Once all appeals are resolved, the IRA Committee will make its final recommendation to the University President.
